Close. Bounded rationality is the idea that we make decisions that are rational, but within the limits of the information available to us and our mental capabilities. Economists who think of us as 'boundedly rational' don't see us as an 'economic superman', or homo economicus that spends his life optimizing the happiness created by every decision. Instead, they see us as satisficers — as people who choose the option that will satisfy their needs and wants without putting too much ...
