A subset of business intelligence (BI), business analytics is generally implemented with the goal of identifying actionable data. Business intelligence is typically descriptive, focusing on the strategies and tools utilized to acquire, identify, and categorize raw data and report on past or current events.

Business Analytics: Everything You Need to Know ...

Business analytics is the process of looking at and assessing the wealth of data your company already has at its disposal and using it to make data-driven decisions. It moves beyond just looking at numbers to see what happened. Instead, business analytics also endeavors to give insight into why things happened and suggests what steps to take next.
