This book provides an authoritative history of the Brazilian army from the army’s overthrow of the monarchy in 1889 to its support of the coup that established Brazil’s first civilian dictatorship in 1937. The period between these two events laid the political foundations of modern Brazil—a period in which the army served as the core institution of an expanding and modernizing Brazilian state. The book is based on detailed research in Brazilian, British, American, and French archives, and on numerous interviews with surviving military and civilian leaders. It also makes extensive use of hitherto unused internal army documents, as well as of private correspondence and diaries. It is thus able to shed new light on the army’s personnel and ethos, on its ties with civilian elites, on the consequences of military professionalization, and on how the army reinvented itself after the collapse of its command structure in the crisis of 1930—a reinvention that allowed the army to become the backbone of the post-1937 dictatorship of Getúlio Vargas.

New competitive realities have ruptured industry boundaries, overthrown much of standard management practice, and rendered conventional models of strategy and growth obsolete. In their stead have come the powerful ideas and methodologies of Gary Hamel and C.K. Prahalad, whose much-revered thinking has already engendered a new language of strategy. In this book, they develop a coherent model for how today’s executives can identify and accomplish no less than heroic goals in tomorrow’s marketplace. Their masterful blueprint addresses how executives can ease the tension between competing today and clearing a path toward leadership in the future.

Discusses the job of, and levels in, the United States Department of Transportation, why it was developed, how it works, and laws various secretaries of transportation have passed.

Transconstitutionalism is a concept used to describe what happens to constitutional law when it is emancipated from the state, in which can be found the origins of constitutional law. Transconstitutionalism does not exist because a multitude of new constitutions have appeared, but because other legal orders are now implicated in resolving basic constitutional problems. A transconstitutional problem entails a constitutional issue whose solution may involve national, international, supranational and transnational courts or arbitral tribunals, as well as native local legal institutions. Transconstitutionalism does not take any single legal order or type of order as a starting-point or última ratio. It rejects both nation-statism and internationalism, supranationalism, transnationalism and localism as privileged spaces for solving constitutional problems. The transconstitutional model avoids the dilemma of ‘monism versus pluralism’. From the standpoint of transconstitutionalism, a plurality of legal orders entails a complementary and conflicting relationship between identity and alterity; constitutional identity is rearticulated on the basis of alterity. Rather than seeking a ‘Herculean Constitution’, transconstitutionalism tackles the many-headed Hydra of constitutionalism, always looking for the blind spot in one legal system and reflecting it back against the many others found in the world’s legal orders.

This classic work of constitutional theory analyzes the general structure of constitutional rights and their judicial application. It deals with a wide range of problems common to all systems of constitutional rights review - from balancing rights to deciding the limits of their scope.
