Ranking the Web Frontier - Kevin McCurley

By the 1920s, Americans were going to the movies 30 times a year, on average, and that number was growing. The first "blockbuster", 1939's *Gone with the Wind*, was in theaters for more than four years and sold one ticket for every two Americans. Beyond its raw popularity, the film was notable for another reason.

In these quickly changing times, this volume re-imagines the classroom after COVID-19. No one could have fathomed the multiple ways education would change when the country first entered into the pandemic in March, 2020. In this regard, this volume offers pedagogy that will create teaching opportunities in both virtual and physical classrooms. Ideas are meant to be shared and evolve into methods that work for both teachers and pupils.

This collection of essays is a compilation of the latest research in first-year composition, including pedagogy, praxis, debate, and assessment. Originally begun as a collection of panel presentations from the Rocky Mountain Modern Language Association annual conference, it has since evolved to include innovative pedagogy regardless of presentation status. The book is divided into presentation “panels,” in order to present the reader with innovative pedagogy and thought-provoking conversations concerning the first-year classroom, assessment, and pedagogy. It will benefit anyone who studies or engages with first-year composition, including graduate students, instructors, and administration.

In these quickly changing times, this volume re-imagines the classroom after COVID-19. No one could have fathomed the multiple ways education would change when the country first entered into the pandemic in March, 2020. In this regard, this volume offers pedagogy that will create teaching opportunities in both virtual and physical classrooms. Ideas are meant to be shared and evolve into methods that work for both teachers and pupils.

Crises often leave people in vulnerable situations in which a moment in time can function as a turning point of a catastrophic situation for the better or worse. From another perspective, the concept of crisis signifies losing control of everyday privileges, such as that of a pandemic. Therefore, the interaction of rhetoric and sociolinguistics in times of crisis is inevitable. It is crucial to internalize how rhetoric, an effective skill from ancient times to make meaning of sociological breakthrough events, changed the course of events as well as the fate of humanity. Within the same context, research should focus on diverse disciplines to explore, investigate, and analyze the concept of “crisis” from global, sociolinguistic, and rhetorical perspectives. Rhetoric and Sociolinguistics in Times of Global Crisis explores and situates the concept of global crisis within rhetoric and sociolinguistics as well as other disciplines such as education, technology, society, language, and politics. The chapters included bridge the gap to initiate a discussion on understanding how rhetoric and sociolinguistics can create critical awareness for individuals, societies, and learning environments

during times of crisis. While highlighting concepts such as rhetorical evolution, political rhetoric, digital writing, and communications, this book is a valuable reference tool for language teachers, writing experts, communications specialists, politicians and government officials, academicians, researchers, and students working and studying in fields that include rhetoric, education, linguistics, culture, media, political science, and communications.

Privacy Matters examines how communications and writing educators, administrators, technological resource coordinators, and scholars can address the ways surveillance and privacy affect student and faculty composing, configure identity formation, and subvert the surveillance state. This collection offers practical analyses of surveillance and privacy as they occur within classrooms and communities. Organized by themes—surveillance and classrooms, surveillance and bodies, surveillance and culture—Privacy Matters provides writing, rhetoric, and communication scholars and teachers with specific approaches, methods, inquiries, and examinations into the impact tracking and monitoring has upon people's habits, bodies, and lived experiences. While each chapter contributes a new perspective in the discipline and beyond, Privacy Matters affirms that these analyses remain inconclusive. This collection is a call for scholars, researchers, activists, and educators within rhetoric and composition to continue the scholarly conversation because privacy matters to all of us. Contributors: Christina Cedillo, Jenae Cohn, Dànielle Nicole DeVoss, Dustin Edwards, Norah Fahim, Ann Hill Duin, Gavin P. Johnson, John Peterson, Santos Ramos, Colleen A. Reilly, Jennifer Roth Miller, Jason Tham, Stephanie Vie

From Victor Halperin's *White Zombie* (1932) to George A. Romero's landmark *Night of the Living Dead* (1968) and AMC's hugely successful *The Walking Dead* (2010–), zombie mythology has become an integral part of popular culture. In a reversal of the typical pattern of adaptation, the zombie developed onscreen before appearing in short stories and comic books during the 20th century, and more recently as subjects of more traditional novels. This collection of new essays examines some of the most influential and inventive zombie literature, from the early stories to the most recent narratives, including some told from a zombie perspective.

The new playbook for innovation and startup success is emerging from beyond Silicon Valley--at the "frontier." Startups have changed the world. In the United States, many startups, such as Tesla, Apple, and Amazon, have become household names. The economic value of startups has doubled since 1992 and is projected to double again in the next fifteen years. For decades, the hot center of this phenomenon has been Silicon Valley. This is changing fast. Thanks to technology, startups are now taking root everywhere, from Delhi to Detroit to Nairobi to Sao Paulo. Yet despite this globalization of startup

Read Free Beyond Frontier Innovations First Year Composition

activity, our knowledge of how to build successful startups is still drawn primarily from Silicon Valley. As venture capitalist Alexandre Lazarow shows in this insightful and instructive book, this Silicon Valley "gospel" is due for a refresh--and it comes from what he calls the "frontier," the growing constellation of startup ecosystems, outside of the Valley and other major economic centers, that now stretches across the globe. The frontier is a truly different world where startups often must cope with political or economic instability and lack of infrastructure, and where there might be little or no access to angel investors, venture capitalists, or experienced employee pools. Under such conditions, entrepreneurs must be creators who build industries rather than disruptors who change them because there are few existing businesses to disrupt. The companies they create must be global from birth because local markets are too small. They focus on resiliency and sustainability rather than unicorn-style growth at any cost. With rich and wide-ranging stories of frontier innovators from around the world, Out-Innovate is the new playbook for innovation--wherever it has the potential to happen.

This publication summarises the main findings of a series of high-level expert workshops, organised with support by the European Commission, to deepen the understanding how OECD countries can move towards a broad-based form of innovation policy for regions and cities. Weaknesses in technology and knowledge diffusion are weighing on productivity growth and innovation in OECD countries, particularly in firms that are distant from the technological frontier (global or national). This in turn weakens their capacity to meet future challenges and undermines inclusive growth.

Recoge: Europe in the global economy: the state of play - 2. The short term (2008-2010) - 3. Euroworld 2015: a european strategy for globalisation.
