<p>It all began in Maranello, a small town south of Modena, Italy, where Enzo Ferrari founded a car factory that would conquer the realm of automobile enthusiasts for a long time to come. A love for Ferrari lasts a lifetime: anyone who has entered the magic triangle of power, speed, and beauty under the sign of the prancing horse remains captivated. This book presents all models in chronological order, from the Spider Touring of 1948 to the new LaFerrari of 2013. Includes the following models: 458 Italia FF F12berlinetta LaFerrari</p>
<p>A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoeengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement?an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." —Katie Patrick, author of How to Save the World</p>

<p>Since its introduction in 1975, the BMW 3-series has earned a reputation as one of the world's greatest sports sedans. Unfortunately, it has also proven one of the more expensive to service and maintain. This book is dedicated to the legion of BMW 3-series owners who adore their cars and enjoy restoring, modifying, and maintaining them to perfection; its format allows more of these enthusiasts to get out into the garage and work on their BMWs-and in the process, to save a fortune. Created with the weekend mechanic in mind, this extensively illustrated manual offers 101 projects that will help you modify, maintain, and enhance your BMW 3-series sports sedan. Focusing on the 1984-1999 E30 and E36 models, 101 Performance Projects for Your BMW 3-Series presents all the necessary information, covers all the pitfalls, and assesses all the costs associated with performing an expansive array of weekend projects.</p>
<p>This book covers the background, conception, design, production and aftermath of the iconic Ferrari 288 GTO, including the prototypes, the early production cars, the mainstream production cars in their various specification guises, and the Evolution cars planned for the aborted Group B FIA race series. It features over 400 relevant photographs, from original production images to the cars as they are today, including the 1984 Geneva Salon where the car debuted, the first ever GTO Reunion in 1985, current salon and action images, right up to the 25th Anniversary Ferrari 288 GTO Reunion held in America in 2009. Also featured are the actual factory production approval sheets, as filed with the Italian government, in an illustrated technical drawing form, along with a chassis by chassis register of every 288 GTO built, including destroyed prototypes, production cars, and GTO Evoluzionies – in fact all 284 cars ever built.</p>
