Introduction

The presence and intensity of media influences television, radio, music, computers, films, videos, and the Internet are increasingly recognized as an important part of the social ecology of children and youth, and these influences

Read Free

Chapter 1

have become more visible and volatile in recent decades.

Research that explores the level and effects of media influences calls for measurements of the quantity and character of exposure to a variety of potentially overlapping media sources, an analysis of the content of the

Read Free

Chapter 1

media output, and examination of the social context and relationships that are associated with the media experience. Recognizing the importance of this research, the Board on Children, Youth, and Families, under the auspices of the National Research Council and the

Read Free

Chapter 1

Institute of Medicine,
and with the
sponsorship of the
Henry J. Kaiser
Family Foundation,
held a workshop in
March 2006. Its
purpose was twofold:
to examine the quality
of the measures used
in studies of the
effects of media on
children's health and
development and to

Read Free

Chapter 1

identify gaps in both research and practice. The goal was for a variety of experts to consider steps and strategies that could move this research forward and improve its utility for helping parents, practitioners, and policy makers guide young people in navigating a media-rich environment.

Read Free

Chapter 1

Studying Media Effects on Children and Youth provides a summary of that discussion, supplemented with information from two papers prepared for the workshop. It begins with an examination of the potential impact of media exposure, followed by a
