Featuring the Third Doctor as played by Jon Pertwee with his companion Sarah Jane Smith and UNIT

Welcome to a Steampunk wild west starring Doc Holliday, with zombies, dinosaurs, robots, and cowboys. The time is April, 1885. Doc Holliday lies in bed in a sanitarium in Leadville, Colorado, expecting never to leave his room again. But the medicine man and great chief Geronimo needs him for one last adventure. Renegade Comanche medicine men object to the newly-signed treaty with Theodore Roosevelt. They are venting their displeasure on two white men who are desecrating tribal territory in Wyoming. Geronimo must protect the men or renege on his agreement with Roosevelt. He offers Doc one year of restored health in exchange for taking on this mission. Welcome to the birth of American paleontology, spearheaded by two brilliant men, Edward Drinker Cope and Othniel Charles Marsh, two men whose genius is only exceeded by their hatred for each other's guts. Now, with the aid of Theodore Roosevelt, Cole Younger, and Buffalo Bill Cody, Doc Holliday must save Cope and Marsh not only from the Comanches, not only from living, breathing dinosaurs, but from each other. And that won't be easy. From the Trade Paperback edition.

A fascinating biography of one of the key figures in the early study of dinosaurs.

Science has always been part of Doctor Who. The first episode featured scenes in a science laboratory and a science teacher, and the 2020 season's finale highlighted a scientist's key role in Time Lord history. Hundreds of scientific characters, settings, inventions, and ethical dilemmas populated the years in between. Behind the scenes, Doctor Who's original remit was to

teach children about science, and in the 1960s it even had a scientific advisor. This is the first book to explore this scientific landscape from a broad spectrum of research fields: from astronomy, genetics, linguistics, computing, history, sociology and science communication through gender, media and literature studies. Contributors ask: What sort of scientist is the Doctor? How might the TARDIS translation circuit and regeneration work? Did the Doctor change sex or gender when regenerating into Jodie Whittaker? How do Doctor Who's depictions of the Moon and other planets compare to the real universe? Why was the program obsessed with energy in the 1960s and 1970s, Victorian scientists and sciences then and now, or with dinosaurs at any time? Do characters like Missy and the Rani make good scientist role models? How do Doctor Who technical manuals and public lectures shape public ideas about science?
