The Sounds of Silent Films is a unique collection of investigatory and theoretical essays that, for the first time, unite up-to-date research on the complex historical performance practices of silent film accompaniment with in-depth analyses of relevant case studies.

Silent films were, of course, never silent at all. However, the sound that used to accompany the screen picture in the early days of cinema has been neglected as an area of study. Altman explores

the various musical, narrative, and even synchronized sound systems that enriched cinema before Jolson spoke.

Richard Serra experimented at an early age with industrial materials like rubber, neon, lead, and steel to create powerful sculptures, canvases, films, and drawings that demonstrate an intelligent and exquisitely surreal spatial sensibility. This volume concentrates on Serra's early films and his so-called "Prop Pieces," created between the late 1960s and the early 1970s. In both media, Serra's main focus is on the artistic action; the positioning, leaning, and adjustment of a lead sheet, and the simple actions recorded on

film produce in both cases a strangely gravity-defying sense of both massiveness and fragility, demonstrating power and sensitivity at the same time. One of the most admired sculptors working today, Richard Serra also occupies an important place in the art of the past fifty years, where he is already counted among the classics. This publication juxtaposes the current exhibition with an array of historic photographs from his first shows.

A survey of the new theories of inflation that have developed over the past two decades in response to the inflationary pressures experienced by Western countries examines the shifting debate from explaining

inflation as a "causal" process to explaining its increase as a result of constantly changing expectations.

The Nag Hammadi Scriptures, edited by Marvin Meyer, is the most complete, up-to-date, one-volume, English-language edition of the renowned library of Gnostic manuscripts discovered in Egypt in 1945, which rivaled the Dead Sea Scrolls find in significance. It includes the Gospel of Thomas, the Gospel of Mary, and the recently discovered Gospel of Judas, as well as other Gnostic gospels and sacred texts. This volume also includes introductory essays, notes, tables, glossary, index, etc. to help the reader understand the context and

contemporary significance of these texts which have shed new light on early Christianity and ancient thought. The compilation of ancient manuscripts that constitute The Nag Hammadi Scriptures is a discovery that challenges everything we thought we knew about the early Christian church, ancient Judaism, and Greco-Roman religions.

In *Citizens Plus*, Alan Cairns unravels the historical record to clarify the current impasse in negotiations between Aboriginal peoples and the state. He considers the assimilationist policy assumptions of the imperial era, examines more recent government initiatives, and analyzes the emergence of the

nation-to-nation paradigm given massive support by the Royal Commission on Aboriginal Peoples. We are battered by contending visions, he argues - a revised assimilation policy that finds its support in the Canadian Alliance Party is countered by the nation-to-nation vision, which frames our future as coexisting solitudes. Citizens Plus stakes out a middle ground with its support for constitutional and institutional arrangements which will simultaneously recognize Aboriginal difference and reinforce a solidarity which binds us together in common citizenship. At the dawn of the twenty-first century, the Nor-tec phenomenon emerged from the border city of Tijuana and through the Internet, quickly conquered a global audience. Marketed as a kind of "ethnic" electronic dance music, Nor-tec samples sounds of traditional music from the north of Mexico, and transforms them through computer technology used in European and American techno music and electronica. Tijuana has media links to both Mexico and the United States, with peoples, currencies, and

cultural goods--perhaps especially music--from both sides circulating intensely within the city. Older residents and their more mobile, cosmopolitan-minded children thus engage in a constant struggle with identity and nationality, appropriation and authenticity. Nor-tec music in its very composition encapsulates this city's struggle, resonating with issues felt on the global level, while holding vastly different meanings to the variety of communities that embrace it. With an impressive hybrid of musicology, ethnomusicology, cultural and performance studies, urbanism, and border studies, Nor-tec Rifa! offers compelling insights into the cultural production of Nor-tec as it stems

from norte? a, banda, and grupera traditions. The book is also among the first to offer detailed accounts of Nor-tec music's composition process.

Roscoe Pound, in the introduction, gives a panorama of the various schools of legal philosophy, & places natural law in its proper perspective relative to jurisprudence.
