In the twenty-first century we speak of a geospatial revolution, but over one hundred years ago another mapping revolution was in motion. Women's lives were in motion: they were playing a greater role in public on a variety of fronts. As women became more mobile (physically, socially, politically), they used and created geographic knowledge and maps. The maps created by American women were in motion too: created, shared,

2012 distributed as they worked to transform their landscapes. Long overlooked, this women's work represents maps and mapping that today we would term community or participatory mapping, critical cartography and public geography. These historic examples of women-generated mapping represent the adoption of cartography and geography as part of women's work. While cartography and map use are not new, the adoption and application of this technology and form of communication in women's work and in multiple examples in the context of their social work, is

unprecedented. This study explores the implications of women's use of this technology in creating and presenting information and knowledge and wielding it to their own ends. This pioneering and original book will be essential reading for those working in Geography, Gender Studies, Women's Studies, Politics and History.

Following the recent global financial crisis there is a growing interest in alternative finance – and microfinance in particular – as new instruments for providing financial services in a socially responsible way or as an alternative to traditional banking.

Nonetheless, correspondingly there is also a lack of clarity about how to regulate alternative financial methods particularly in light of the financial crisis' lessons on regulatory failure and

shadow banking's risks. This book considers microfinance from a legal and regulatory perspective. Microfinance is the provision of a wide range of financial services, particularly credit but also remittances, savings, to low-income people or financially excluded people. It combines a business structure with social inspiration, often resorts to technological innovations to lower costs (Fintech: e.g. crowdfunding and mobile banking) and merges with traditional local experiences (e.g. financial cooperatives and Islamic finance), this further complicating the regulatory picture. The book

2012 describes some of the unique dimensions of microfinance and the difficulties that this can cause for regulators, through a comparative analysis of selected European Union (EU) countries' regimes. The focus is in fact on the EU legal framework, with some references to certain developing world experiences where relevant. The book assesses the impact and validity of current financial regulation principles and rules, in light of the most recent developments and trends in financial regulation in the wake of the financial crisis and compares microfinance

A rich investigation into Morocco's urban politics Over the past thirty years, Morocco's cities have transformed dramatically. To take just one example, Casablanca's medina is now obscured behind skyscrapers that are funded by global capital and encouraged by Morocco's monarchy, which hopes to transform this city into a regional leader of finance and commerce. Such

changes have occurred throughout Morocco.

Megaprojects are redesigning the cityscapes of Rabat, Tangiers, and Casablanca, turning the nation's urban centers into laboratories of capital accumulation, political dominance, and social control. In *Globalized Authoritarianism*, Koenraad Bogaert links more abstract questions of government, globalization, and neoliberalism with concrete changes in the city. Bogaert goes deep beneath the surface of Morocco's urban prosperity to reveal how neoliberal government and the increased connectivity engendered by

global capitalism transformed Morocco's leading urban spaces, opening up new sites for capital accumulation, creating enormous class divisions, and enabling new innovations in state authoritarianism. Analyzing these transformations, he argues that economic globalization does not necessarily lead to increased democratization but to authoritarianism with a different face, to a form of authoritarian government that becomes more and more a globalized affair. Showing how Morocco's experiences have helped produce new forms of globalization,
