Despite more than a decade of change, the U.S. health care delivery system is still in the early stages of its transformation into a truly effective, cost efficient and compassionate system. In Healthcare.com: RX for Reform, Dr. David Friend, trained in both medicine and business, delineates the symptoms of our ailing healthcare system and offers a vision for the future. Even with the enormous turmoil our health care system has undergone - from the proliferation managed care to the closing of hospitals - large numbers of people continue to receive sub-optimal care. The author discusses several symptoms including: increasing costs uncertain quality of care eroding trust in health care vendors increasing prospect of shareholder liability declining access to providers unclear impact on employee productivity It is time to discard the old, traditional way of thinking about healthcare and take a fresh look at its issues and challenges. To tackle these challenges we must strike a balance between the seemingly dissimilar disciplines of economics, medicine, technology, and politics. Dr. Friend proposes that we tear down the brick
