Publisher description

Like the ground-breaking first edition, *PediatricPsycho-oncology*, Second edition puts the child at the centre ofmedical and psychological care. It broadens the focus beyondtreatment and cure to consider the quality of life of the child andtheir family. Written by an international group of pediatriconcologists and psychologists/psycho-oncologists brought togetherby an expert editorial team, it focuses on the real-life practicalaspects of children undergoing treatment for cancer. This edition has been restructured and opens with a majorsection on Active treatment, which includes chapters addressingquality of life, pain, psychosocial aspects of treatment andinterventions, art therapy and different fantasy-based techniques,palliative care, communication and education, as well as a newchapter on psychopharmacology. Shorter sections then discussurvivorship and care of the dying child, including a new chapteron bereavement. The final section comprises new chapters onethical considerations and on addressing the emotional needs ofchildren whose parents have cancer, as well as a case study oninternational collaboration. An appendix provides acomprehensive overview of tools for evaluation and assessment inpediatric psychooncology. This book is a highly practical resource that will be invaluablefor all health care professionals looking after children andadolescents with cancer.

Pediatric Psycho-Oncology is a comprehensive handbook that provides best practice models for the management of psychological, cognitive, and social outcomes of adolescents living with cancer and their families. Chapters cover a wide range of topics including psychological aspects of particular pediatric cancers and their treatments, how to talk to a child and family at critical times during the disease course, genetic testing, individual, family, educational, psychological and psychiatric interventions, and caring for international patients . Each chapter highlights the necessity of embracing an interdisciplinary approach to ensure that each child has the best options for living with cancer and, when cure is not possible, that death occurs with as much dignity as possible for the child and family. An extensive resource section is appended to provide information on written, online, video, community, national and international services and programs. This book features contributions from experts designed to help clinicians review, anticipate and respond to emotional issues that often arise in the context of treating pediatric cancer patients. Numerous cross-references and succinct tables and figures make this concise reference easy to use. *Pediatric Psycho-Oncology* is an ideal resource for helping pediatric oncologists and nurses recognize when it may be best to refer patients to their mental health colleagues and for those who are establishing pediatric oncology services or adding psychosocial components to existing clinics.

This new textbook has an international authorship and is a practical, up-to-date resource for clinicians responsible for the care of children with oncologic and malignant hematologic disease. It is specifically designed for practicing oncologists and hematologists, pediatricians with an interest in childhood cancer and trainees seeking a systematic approach to these disorders. This new textbook has an emphasis on the visual presentation and ease of reading of contemporary and comprehensive information for children's cancers and contains detailed tables, fact boxes and illustrations. The textbook begins with an introduction to the general principles of the scientific foundation and treatment of childhood cancers and hematological malignancies. Separate sections are then devoted to descriptions of central nervous system tumors, hematological malignancies and solid tumors of childhood which encompass epidemiology, cellular and molecular biology, cancer genetics, immunology, pharmacology and the findings of clinical trials. For each area of science covered, key original references and reviews are highlighted to direct further reading. Diagnostic, biological, and therapeutic issues are integrated into each tumor-specific chapter, with evidence supporting the current rationales for risk stratification and the development of novel therapies. A final section then explores supportive care, palliative care, late effects considerations and psychosocial issues as relate to children's cancer.

Established since 1986 as the definitive text and reference on use of radiation therapy for childhood cancer, *Pediatric Radiation Oncology* is now in its thoroughly revised and updated Fifth Edition. This edition reviews all significant recent clinical trials—including, for the first time, significant European clinical trials—and provides increased coverage of international and Third World issues. The latest cancer staging guidelines are included. New chapters cover psychosocial aspects of radiotherapy for the child and family and medical management of pain, nausea, nutritional problems, and blood count depression in the child with cancer. This edition also has full-color illustrations throughout. A companion website includes the full text and an image bank.

Lanzkowsky's *Manual of Pediatric Hematology and Oncology*, Sixth Edition, is a comprehensive book on patient management, replete with algorithms and flow diagrams on diagnosis and management. Reflecting the considerable advances in the treatment and management of hematologic and oncologic diseases in children, the sixth edition of this successful clinical manual has been entirely updated to incorporate all current treatment protocols, new drugs, and management approaches. Its concise and easy-to-read format will enable readers to make accurate diagnoses and permit them to treat patients without having to reference larger medical textbooks. Based on the new standards of genetic classification and prognostic information that have arisen in the past five years, the sixth edition includes two new chapters (Diagnostic, Molecular, and Genomic Methodologies for the Hematologist, Transfusion Medicine) and several new expanded chapters that were previously sections in consolidated chapters (Myelodysplasia, Myeloid Leukemias, Lymphoid Leukemias, Hemolytic Anemia, and Disorders of Coagulation). Presents a concise, systematic approach to all pediatric hematologic and oncologic disorders in one manual Offers an alternative to bigger references which only cover either oncologic or hematologic disorders in twice as many pages Presents an easy-to-read format: multiple tables, charts, and flow-diagrams for diagnosis and management of pediatric hematologic and oncologic disorders Includes 2 new chapters and several expanded chapters: Diagnostic, Molecular and Genomic Methodologies for the Hematologist, Transfusion Medicine, Myelodysplasia, Myeloid Leukemias, and Lymphoid Leukemias

The development of this inaugural *Handbook of Oncology Social Work: Psychosocial Care for People With Cancer* provides a repository of the scope of oncology social workers' clinical practice, education, research, policy and program leadership in the psychosocial care of people with cancer and their families. It focuses on the unique synergy of social work perspectives, values, knowledge, and skills with the psychosocial needs of cancer patients, their families, and the health care systems in which they are treated. It addresses both the science and art of psychosocial care and identifies the increasing specialization of oncology social work related to its unique knowledge base, skills, role, and the progressive complexity of psychosocial challenges for patients with cancer. This *Handbook* equips the reader with all that we know today in oncology social work about patient and family centered care, distress screening, genetics, survivorship, care coordination, sociocultural and economic diversity, legal and ethical matters, clinical work with adults living with cancer, cancer across the lifespan, their caregivers and families, pediatrics, loss and grief, professional career development, leadership, and innovation. Our hope is that in reading this *Handbook* you will identify new areas where each of you can leave your mark as innovators and change agents in our evolving field of practice.

*This authoritative reference is a comprehensive resource on the biology and genetics of childhood cancer as well as its diagnosis, multimodal treatment, as well as long-term management of young patients with cancer.
