agenda for the next generation of thought about wealth and inequality.

This book is a comprehensive examination of the dynamics of India's energy security policy in the domestic and international context. Over the past decade and a half, energy security has been a constant driver of India's foreign policy. Successive Indian governments have emphasized it as a major concern, next only to food security. The long-term satisfaction of India's energy security needs calls for a fresh and multi-pronged approach. This is imperative in the light of the recent dynamics of India's foreign policy and the challenges that India is facing in its quest for energy security, mainly in the context of diversification of sources abroad and shift to alternative sources in a carbon-controlled environment. This is further intensified in the context of the complex and competitive strategic rivalry between India and China in the Indo-Pacific region, as India looks outward and expands its outreach to meet its pressing energy security challenges. The book presents an in-depth analysis of all such domestic and foreign policy challenges and measures to meet India's fast-growing energy demand in a competitive geopolitical environment.

This book critically examines the role of think tanks as foreign

policy actors. It looks at the origins and development of foreign policy think tanks in India and their changing relevance and position as agents within the policy-making process. The book uses a comparative framework and explores the research discourse of prominent Indian think tanks, particularly on the India-Pakistan dispute, and offers unique insights and perspectives on their research design and methodology. It draws attention to the policy discourse of think tanks during the Composite Dialogue peace process between India and Pakistan and the subsequent support from the government which further expanded their role. One of the first books to offer empirical analyses into the role of these organisations in India, this book highlights the relevance of and the crucial role that these institutions have played as non-state policy actors. Insightful and topical, this book will be of interest to researchers focused on international relations, foreign policy analysis and South Asian politics. It would also be a good resource for students interested in a theoretical understanding of foreign policy institutions in general and Indian foreign policy in particular.

Over the last few decades, many countries have reformed their secured transactions law. One of the main reasons has been the clear link between reform and the availability of credit, and the drive to

improve access to finance, particularly for micro, small and medium-sized enterprises. This book focuses particularly on developing economies in Africa, which have legal frameworks influenced by English, French, Belgian, Roman-Dutch and other laws. Reform in this area of law across African countries has taken a number of forms, which are explored and discussed in this book. Secured Transactions Law Reform in Africa is a mixture of a critical description of the pre-reform law and practice, and the reform process itself. It also includes a comparative analysis of the legal provisions and an examination of the early results of the reforms. The book sets out a road map for the future of secured transactions reform; primarily in Africa, but also in other countries that have undertaken or are contemplating similar reforms. This book is the second in a series of books about Secured Transactions Law in countries around the world, and its reform, both on a national and an international scale. The first book, Secured Transactions Law Reform: Principles, Policies and Practice, was published in 2016.
