Using Your Head as Well as Your Heart to Raise School-Aged Children This 4th edition of Common Sense Parenting® offers parents of children ages 6-16 a menu of proven techniques to use while facing family challenges: a teen who's defiant; siblings who constantly bicker; a child having trouble in school; and parents and kids who don't communicate or have fun together anymore. Step-by-step strategies aid parents in building good family relationships, preventing and correcting misbehavior, using consequences to improve behavior, teaching self-control, and staying calm. This updated edition shows parents how to approach discipline as positive teaching rather than punishment. As each new parenting technique is introduced, the authors explain each step, provide many clear examples, and give you an action plan for implementing it in your home. Also addressed are topics of special interest - how to deal with school problems, computer misuse, and Internet and social media dangers.

The broad national coverage and array of topics in Natural Resources Law is of interest to readers across the country. Most cases are introduced with a photo or map of the place, along with a context-setting paragraph. The text conveys the drama behind resource disputes and policy and the love-of-place. Each group of cases—both foundational cases as well as new decisions—begins with a factually rich discussion problem tailored to the cases that follow. Many problems mirror traditional essay exam questions; others raise contemporary policy issues. This highly teachable book groups readings into discrete, assignment-sized chunks of 25-40 pages, allowing coverage of 2-4 cases or one problem during each class section. The main emphasis is on primary sources, and each chapter opens with relevant statutory and regulatory sections. The Third Edition sees an expanded emphasis on energy, exploring the Deepwater Horizon disaster, fracking, renewable energy development on federal lands, and the Keystone XL Pipeline. Climate change is addressed in every chapter. More great problems appear alongside photographs and slides. New cases and notes examine Connecticut v. American Electric Powe r (climate change and nuisance law); Summers v. Earth Island Institute and Monstanto v. Geerton Seed Farms (standing); Carciari v. Salazar (Indian Reorganization Act); Stop the Beach Renourishment v. Florida DEP and PPL Montana, LLC v. Montana (public trust); Arizona Cattle Growers' Ass'n v. Salazar and Center for Biological Diversity v. Kempthorne (Endangered Species Act); Edwards Aquifer Authority v. Day (water law); National Mining Ass'n v. Jackson (mountaintop removal/valley fill); and Casitas Municipal Water Dist. v. United States (regulatory takings and water rights.) Features: broad national coverage place-based introduces most cases with a photo or map, along with a context-setting paragraph conveys the drama behind resource disputes and policy and the love-of-place problem-based introduces each group of cases with a factually rich discussion problem tailored to the cases that follow problems mirror traditional essay exam questions or raise contemporary policy issues includes both foundational cases and new decisions teachable groups readings into discrete, assignment-sized chunks of 25-40 pages allows coverage of 2-4 cases or one problem during each class section puts the main emphasis on primary sources provides relevant statutory and regulatory sections in each chapter extensive teaching support package Thoroughly updated, the revised Third Edition presents: expanded emphasis on energy the Deepwater Horizon disaster fracking renewable energy developmenton federal lands the Keystone XL Pipeline greater coverage of climate change in every chapter

Behavior analysis, a rapidly growing profession, began with the use and application of conditioning and learning techniques to modify the behavior of children or adults presenting severe management problems, often because of developmental disabilities. Now behavior analysts work in a variety of settings, from clinics and schools to workplaces. Especially since their practice often involves aversive stimuli or punishment, they confront many special ethical challenges. Recently, the Behavior Analysis Certification Board codified a set of ten fundamental ethical guidelines to be followed by all behavior analysts and understood by all students and trainees seeking certification. This book shows readers how to follow the BACB guidelines in action. The authors first describe core ethical principles and then explain each guideline in detail, in easily comprehensible, everyday language. The text is richly illuminated by more than a hundred vivid case scenarios about which the authors pose, and later answer questions for readers. Useful appendices include the BACB Guidelines, an index to them, practice scenarios, and suggested further reading. Practitioners, instructors, supervisors, students, and trainees alike will welcome this invaluable new aid to professional development.

The NPR series also includes the "Consider the Issues" and the new edition of "Face the Issues."

In July 1997, twenty-five of America's most influential journalists sat down to try and discover what had happened to their profession in the years between Watergate and Whitewater. What they knew was that the public no longer trusted the press as it once had. They were keenly aware of the pressures that advertisers and new technologies were putting on newsrooms around the country. But, more than anything, they were aware that readers, listeners, and viewers — the people who use the news — were turning away from it in droves. There were many reasons for the public's growing lack of trust. On television, there were the ads that looked like news shows and programs that presented gossip and press releases as if they were news. There were the "docudramas," television movies that were an uneasy blend of fact and fiction and which purported to show viewers how events had "really" happened. At newspapers and magazines, celebrity was replacing news, newsroom budgets were being slashed, and editors were pushing journalists for more "edge" and "attitude" in place of reporting. And, on the radio, powerful talk personalities led their listeners from sensation to sensation, from fact to fantasy, while deriding traditional journalism. Fact was blending with fiction, news with entertainment, journalism with rumor. Calling themselves the Committee of Concerned Journalists, the twenty-five determined to find how the news had found itself in this state. Drawn from the committee's years of intensive research, dozens of surveys of readers, listeners, viewers, editors, and journalists, and more than one hundred intensive interviews with journalists and editors, The Elements of Journalism is the first book ever to spell out — both for those who create and those who consume the news — the principles and responsibilities of journalism. Written by Bill Kovach and Tom Rosenstiel, two of the nation's preeminent press critics, this is one of the most provocative books about the role of information in society in more than a generation and one of the most important ever written about news. By offering in turn each of the principles that should govern reporting, Kovach and Rosenstiel show how some of the most common conceptions about the press, such as neutrality, fairness, and balance, are actually modern misconceptions. They also spell out how the news should be gathered, written, and reported even as they demonstrate why the First Amendment is on the brink of becoming a commercial right rather than something any American citizen can enjoy. The Elements of Journalism is already igniting a national dialogue on issues vital to us all. This book will be the starting point for discussions by journalists and members of the public about the nature of journalism and the access that we all enjoy to information for years to come.
