With America's founding principles being debated today as never before, Russell Shorto looks back to the era in which those principles were forged. Drawing on new sources, he weaves the lives of six people into a seamless narrative that casts fresh light on the range of experience in colonial America on the cusp of revolution. While some of the protagonists--a Native American warrior, a British aristocrat, George Washington--play major roles on the field of battle, others--a woman, a slave, and a laborer--struggle no less valiantly to realize freedom for themselves. Through these

Before Washington crossed the Delaware, Henry Knox crossed Massachusetts in winter—with 59 cannons in tow. In 1775 in the dead of winter, a bookseller named Henry Knox dragged 59 cannons from Fort Ticonderoga to Boston—225 miles of lakes, forest, mountains, and few roads. Why do revolutions happen? Decades of social science research have brought us little closer to understanding where, when and amongst whom they occur. In this groundbreaking book, Eric Selbin argues that we need to look beyond the economic, political and social structural conditions to the thoughts and feelings of the people who make revolutions. In particular, he argues, we need to understand the stories people relay and rework of past injustices and struggles as they struggle in the present towards a better future. Ranging from the French Revolution to the Battle for Seattle, via Russia, China, Cuba, Vietnam and Nicaragua, Selbin makes the case that it is myth, memory and mimesis which create, maintain and extend such stories. Revolution, Rebellion, Resistance identifies four kinds of enduring revolutionary story - Civilizing and Democratizing, The Social Revolution, Freedom and Liberation and The Lost and Forgotten - which do more than report on events, they catalyse changing the world.
