### Grounded Theory And The Constant

Constant Comparative Method - Grounded Theory. The goal of the Grounded Theory approach is to generate theories that explain how some aspect of the social world 'works.'. The goal is to develop a theory that emerges from and is therefore connected to the reality the theory is developed to explain. The contant comparative method is a method for analyzing data in order to develop a grounded theory.

## **Constant Comparative Method - Grounded Theory**

Grounded theory is a systematic methodology in the social sciences involving the construction of theories through methodical gathering and analysis of data. This research methodology uses inductive reasoning, in contrast to the hypothetico-deductive model of the scientific method. A study using grounded theory is likely to begin with a question, or even just with the collection of qualitative data. As researchers review the data collected, repeated ideas, concepts or elements become apparent, an

In grounded theory, the researcher uses multiple stages of collecting, refining, and categorizing the data. The researcher uses the strategies of the making constant comparisons and applying theoretical sampling to obtain a theory grounded in the data.

Grounded Theory (GT) use has spread to various fields of study since Glaser and Strauss' (1967) introduction of the methodology (Tan, 2010, p. 94). A review of the literature on the Constant Comparative Method shows the same movement. CCA, as a technique or method, appears to be considered as synonymous with GT.

Grounded theory (GT) is a widely applied research method that is spelled out in several books including the foundational work by Glaser and Strauss (1967); the current editions of pathbreaking works by Charmaz (2014), Clarke (2005), and Corbin and Strauss (2015); and the comprehensive outline by Bryant (2017).
