Network Solutions Ssl Certificate

With hacking and large-scale data breaches on the rise, it is best practice for any website that interacts with customer data to be protected via an SSL Certificate. Network Solutions uses 256-Bit encryption, which refers to the size of the decryption key used to unscramble encrypted data. 256-Bit encryption is considered computationally infeasible to crack and is known as a very strong SSL security.

Get an SSL Certificate for Your Website | Network Solutions

On 13 Oct 2020, Network Solutions made some changes to their email services that resulted in a disruption for many people. [] The change had to do with a new certificate being used in the immediate wake of that event last week and the residual confusion, it seems that someone has launched a sophisticated email phishing scheme targeting Network Solutions email customers, and referencing the ...
