Data dossiers for field devices (detectors, transmitters, valves, etc.) and control logic (electronics) are presented. The dossiers are based on various sources, such as OREDA, RNNP (Risk level in the Norwegian Petroleum industry), data from operational reviews, vendor data as well as additional expert judgements. The handbook also gives a short review of the PDS method.

The 17-item PDS possesses excellent psychometric properties (Griesel et al., 2006; this study  $\alpha=0.91$ ). The measure was originally included to better characterize the sample. However, in the process of data analyses, it was decided to include the PDS as an additional mediator (see below for details).
