Network Protection And Automation Guide - EEP

Application The relay can be used in applications where time graded overcurrent and earth fault protection is required. The relay can be used to provide selective protection for overhead and underground distribution feeders.

Type MCGG 22, 42, 52, 53, 62, 63 & 82 Overcurrent Relay ...

In electrical engineering, a protective relay is a relay device designed to trip a circuit breaker when a fault is detected.:4. The first protective relays were electromagnetic devices, relying on coils operating on moving parts to provide detection of abnormal operating conditions such as over-current, over-voltage, reverse power flow, over-frequency, and under-frequency.

Protective relay - Wikipedia

Protective Relays Application Guide: Gec Alsthom... relays with the exception of the ICW51B are suitable for application on three-phase systems only. The ICW51B may be applied on single-phase and two-phase as well as three-phase systems. None of these relays are intended for use as fault protective or regulating devices.
