Freud may justly be called the most influential intellectual legislator of his age. His creation of psychoanalysis was at once a theory of the human psyche, a therapy for the relief of its ills, and an optic for the interpretation of culture and society. Despite repeated criticisms, attempted refutations, and qualifications of Freud's work, its spell remained powerful well after his death and in fields far removed from psychology as it is narrowly defined.

Freud's theory provides one conceptualization of how personality is structured and how the elements of personality function. In Freud's view, a balance in the dynamic interaction of the id, ego, and superego is necessary for a healthy personality. While the ego has a tough job to do, it does not have to act alone.

Freud's Id, Ego, and Superego - Verywell Mind

Freud used the term 'repression' to describe this process of keeping unwanted thoughts and memories out of conscious awareness. To Freud, the unconscious is the dumping ground for difficult issues we don't want to face. But not facing issues doesn't resolve them and they can fester beyond our awareness causing havoc with our lives.
