Wood Carving: Projects and Techniques by Chris Pye

Woodcarving is the process of using either hand tools or power tools to remove wood from portions of a piece. It

Acces PDF Wood Carving Projects And Techniques

can be used to add texture, decorative elements or to create a final piece such as a wooden spoon. Some woodworkers combine carving and piercing. Piercing is simply going all the way through the piece.

Whittling. Whittling is when you carefully shave small pieces of wood off a work piece. Typically this is done using a whittling tool. This style is pretty much your all-purpose wood carving method, and it is usually what people think of first when considering wood carving as a pastime. Chip Carving.
